

Data Analysis and Probability Connections

Contents

Chapter 1: Elements of Statistics

- 1.1. Getting Started
- 1.2. Types of Data

Chapter 2: Organizing and Displaying Data

- 2.1. Displaying Categorical Data
- 2.2. Displaying Quantitative Data
- 2.3. Misleading Graphs

Chapter 3: Describing Data with Numbers

- 3.1. Measures of Center
- 3.2. Measures of Spread
- 3.3. Measures of Position
- 3.4. Box-and whisker Plots
- 3.5. Chebyshev's Rule and the Empirical Rule

Chapter 4: Data with Two Variables

- 4.1. Scatter Plots and Correlation
- 4.2. Pearson's Correlation Coefficient
- 4.3. Slopes and Equations of Fitted Lines
- 4.4. The Least Squares Line
- 4.5. The Median-Median Line

Chapter 5: Probability

- 5.1. What is Probability?
- 5.2. Outcomes and Events
- 5.3. Basic Probability Rules
- 5.4. Conditional Probability and Independence
- 5.5. Multiplication Rules
- 5.6. Geometric Probability

Chapter 6: Methods for Counting Outcomes

- 6.1. The Multiplication Principle
- 6.2. Permutations
- 6.3. Combinations
- 6.4. Mixed Counting Problems

Chapter 7: Random Variables and Probability Distributions

- 7.1. What is a Random Variable?
- 7.2. The Mean of a Random Variable
- 7.3. Variance and Standard Deviation for Random Variables
- 7.4. Binomial Random Variables
- 7.5. The Normal Curve
- 7.6. Normal Approximations

Chapter 8: Distributions from Random Samples

- 8.1. The Distribution of Sample Means
- 8.2. The Distribution of Sample Proportions

Chapter 9: Estimating with Confidence

- 9.1. What is a Confidence Interval?
- 9.2. Confidence Intervals for Proportions
- 9.3. Confidence Intervals for Means
- 9.4. Sample Size

Chapter 10: Testing Hypotheses

- 10.1. What is a Hypothesis Test?
- 10.2. Tests About Proportions
- 10.3. Tests About Means
- 10.4. The P-value for a Test
